Table of Contents

TRACK A: LEADING THE DYNAMICS OF MANUFACTURING

Strategic Management of Technology for the Manufacturing Enterprise
Richard L. Smith and Philip M. Wolfe 1

A Systematic Procedure for Assigning Functions to Humans and Machines in a Manufacturing Environment
Anil Mital 9

Manufacturing Leadership
James A. Tompkins 16

TRACK B: TOTAL CUSTOMER SATISFACTION

Achieving Customer Satisfaction by Integrating Quality into Day-to-Day Work
Lori L. Silverman and Steven N. Silverman 31

Competitive Vitality: The Next Stage
Ed Heard 32

By What Method?: A Case Study Update on the Application of the Grand Strategy Systems Approach to Total Performance Improvement
D. Scott Sink and David F. Poirier 39

Overcoming Quality Excesses, Abuses, and Misconceptions
James R. Ross 49

Customer Needs Questionnaire
K. Wayne Shirley and Alan C. Spencer 59

Quality and Innovation at 3M: A Strategy for Customer Satisfaction
E. L. Snyder 67

Hocus Pocus — Customer Focus
Carol Sue Ray 87

TQM, Technology, and Process Improvement Increase Customer Satisfaction at American President Companies
Greg Blair and Dave Owen 88

587271

Is the Patient Really My Customer?
Nancy Agnew and James Allen 97

TRACK C: INCREASING COMPETITIVENESS

The Industrial and Systems Engineer: Role in Business Process Re-Engineering and TQM in General
D. Scott Sink 106

Integrate Performance Measures to Focus Every Employee on "What Matters"
Brian Maguire 116

A Time-Based Assessment Model for Small-to-Medium Lower Tier Manufactures
C. M. Rinker and R. S. Sawhney 124

Reward - Results Linkages
Don Roundtree and John Yurkutat 132

Customer Service: The Foundation of Competitiveness
Roger McGrath, Jr. 141

TRACK D: LOGISTICS, TRANSPORTATION, & DISTRIBUTION

I.E. Opportunities
Michael H. Mack 146

Industrial Engineers and Logistics, Transportation, and Distribution
Harry C. Petersen 170

Future Logistics Directions
Paul Griffin 175

Reengineering Manufacturing Operations
Bruce A. Strahan 177

Total Track℠: The UPS Package Tracking System
Pat Canavan 185

A Life-Cycle Approach to System Development, Operation, and Support
Benjamin S. Blanchard 189

CALS for the Commercial Sector: Increased Competitiveness Using an Electronic Commerce Solution
Sharon Kemmerer 198

TRACK E: MANAGEMENT

Computer Process Analysis with Employee Teams
Ben S. Graham, Jr. 207

Stress: The Phantom Phactor in the Excellence Equation
Bruce Bumbarger 214

Saving Money While Aggressively Addressing Environmental Issues: The Duriron Case Study
Stephen C. Wilson and William E. Hammer, Jr. 222

Using Competitive Benchmarking in Service Industries
J. M. Trimm and Eleanor Anderson-Miles 227

Measuring Up to an Improvement Strategy
B. Ray Helton 237

TRACK F: INFORMATION TECHNOLOGY

Pen-Based Computing and Personal Digital Assistants
Jon Utterback and Marc Pujda 249

Bridging the Technology Gap
Michael McLaughlin 260

Improving Manufacturing Operations through Computer Simulation: A Down-to-Earth Approach
M. Kevin Nelson 270

Information Technology Needs in Process Industries
Ken Chancey 280

A Risk Reduction Strategy for Information Technology Projects
Colin O. Benjamin and Manoon Sivapiromrat 288

System for Intelligent Training and Tutoring (SITT): A Hypermedia Approach
Mihir A. Parikh, Alok Srivastava, and Vijay Vaishnavi 297

TRACK G: INNOVATIONS: CASE STUDIES IN REAL SUCCESS

Winning Manufacturing at UNIMAC: A Case Study
James A. Tompkins 307

BellSouth's Process Breakthrough Technique: A Roadmap to Managing and Improving Processes
David M. Klater and D. C. Gossman 324

TRACK H: STUDENT ISSUES

Using Your IE Skills in Non-Traditional Areas: Health Services
Charles Platt 332

TRACK I: APPLIED ERGONOMICS IN INDUSTRY AND BUSINESS

An Automated Process for Computer Work Station Adjustment
Charles D. Hochanadel 335

Ergonomics: Plan the Work, Work the Plan — A Practical Approach to Ergonomic Problem Solving
Malcolm D. Dimiceli 340

TRACK J: MANAGEMENT OF TECHNOLOGY

Transportation Technology and the Future
Gary L. Brosch 345

The Superconducting Super Collider — What Went Wrong?
E. Payson Willard 352
